Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 98-117, drawn to an apparatus having a sprayer; said sprayer comprising a motor, and a nozzle unit; a control valve; and sensing means, classified in Class 239, subclass 289.

Group II: Claims 118-137, drawn to a method for controlling the temperature of a target animal at a given location, classified in Class 134, subclass 37.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (M.P.E.P. § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus without a fixed support for pivotal movement about a first axis and for mounting for pivotal movement about a second axis or a removable elongated nozzle mounted in a nozzle outlet or the apparatus as claimed can be used to practice another and materially different process such as such as spraying liquid on a field for irrigation purposes.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter, the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Paul D. Bianco on December 19, 2007 to request an oral election to the above restriction requirement, but did not receive phone call for election of the invention.
